

Weekly Coal Production

DOE/EIA-0218(93-48)
Production for Week Ended:
November 27, 1993

EIA

Energy
Information
Administration

SUMMARY—As estimated by the Energy Information Administration (EIA) from data on railroad car loadings, U.S. coal production totaled 15 million short tons during the week ended November 27, 1993. This was 23 percent lower than in the previous week, due to the Thanksgiving Day holiday, and 5 percent lower than in the comparable week in 1992. Production east of the Mississippi River totaled 8 million short tons, and production west of the Mississippi River totaled 8 million short tons. Negotiations between the Bituminous Coal Operators' Association and the United Mine Workers of America continued.

...antity data, the value of the number is less than 0.5 thousand short tons. For percentage calculations, the absolute value of the number is less percent.

...93 data are preliminary. Total may not equal sum of components because of independent rounding. Bituminous and Lignite Total includes subbituminous coal, and lignite. The States in the Appalachian Region are Alabama, Eastern Kentucky, Maryland, Ohio, Pennsylvania, Tennessee, and West Virginia. The Interior Region States are Arkansas, Illinois, Indiana, Iowa, Kansas, Western Kentucky, Louisiana, Missouri, Oklahoma. The Western Region States are Alaska, Arizona, California, Colorado, Montana, New Mexico, North Dakota, Utah, Washington, and
